Cloud Communication Architecture

Cloud Server Hosting

- Our cloud servers are in USA, France and Canada.
- Platform can be hosted on AWS, Microsoft Azure, Google Cloud and others.
- Platform can be hosted locally on the customer servers.

Cloud Communication

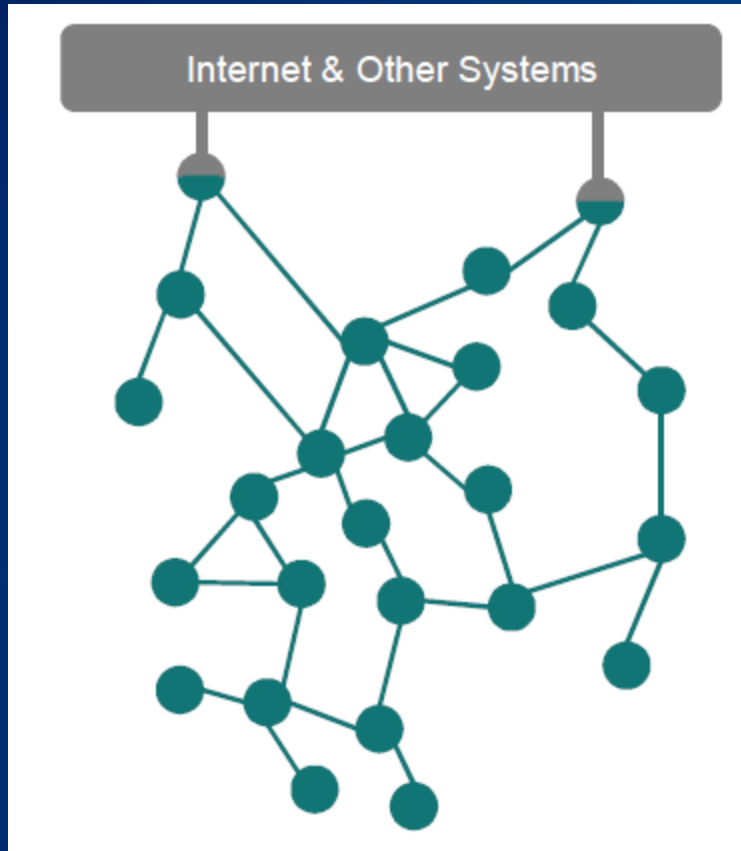

The access to the cloud platform using any device is via HTTPS (point to point secure) connection.

Data Back-up

- Full backup weekly.
- Daily differential backup.
- 15 minutes log backup.
- Back-up data is saved on separate servers in different regions.

Mesh Secure Communication

Dominate SmartSite Mesh Security Features

- Message integrity, confidentiality and replay protection
- Node authenticity
- High availability

Cryptographic Algorithms Used

- AES128 counter mode
- OMAC1 message integrity

Summary

Security

- 24/7 real-time tracking of visitors and contractors.
- Alerts if a visitor or contractor stray from their designated location.
- Authenticate and maintain visitor and staying records.
- Manage blacklist visitors and entities.
- Track walk-ins and appointments.

Safety
