ThingHUB

Sensor Monitoring Platform

Collect, Analyze, Act

ThingHUB Industrial IoT Platform turns your site's raw data into real-time actionable intelligence to help you stay on schedule and on budget.

It greatly improves information collection, data transmission and the processing of sensor data.

Our exclusive mobile apps give you real-time access to take appropriate action in the blink of an eye!

DominateSmartSite
Transforming the way industries work

Wireless Sensors

- Temperature & Humidity Sensors
- Vibration Sensors
- Water Leak, Power Measurement Sensors
- Air Quality, Smoke, Dust & Gas Sensors

Wireless Gateways

- BLE, Wi-Fi, Network
- Cellular
- GPS Enabled

## IoT-based Monitoring Platform

- Sensor & Alert Setup
- Incident Management
- Corrective Actions
- Android & iOS Mobile Apps
- 5 Years Log History

Hardware Designed for Harsh Environment

- No internet connection required
- No AC power required (long-range battery)
- Long transmission range
- Quick DIY installation
- High availability with no single point of failure
- Encrypted and secured

Stay Informed, Stay Connected

Sensors bring tremendous value to your organization:

Asset Maintenance

Condition-based preventive and predictive maintenance of machines, equipment and vehicles through real-time operational data capture and reporting. Eliminate down-time and increase asset utilization like never before.

Safety

Mitigate safety risks through automated man-down (fall detection) and panic/SOS emergency alerts. Resolve hazardous incidents or near misses as they happen.

Environment Monitoring

Utilizing a variety of sensors & wireless communication technologies, managers can monitor site conditions, equipment, materials and workforce for better situational awareness and the ability to make more informed decisions with real-time actionable intelligence.
