Smart Maintenance Management (CMMS)

Maximize Equipment Uptime, Reliability & Availability!

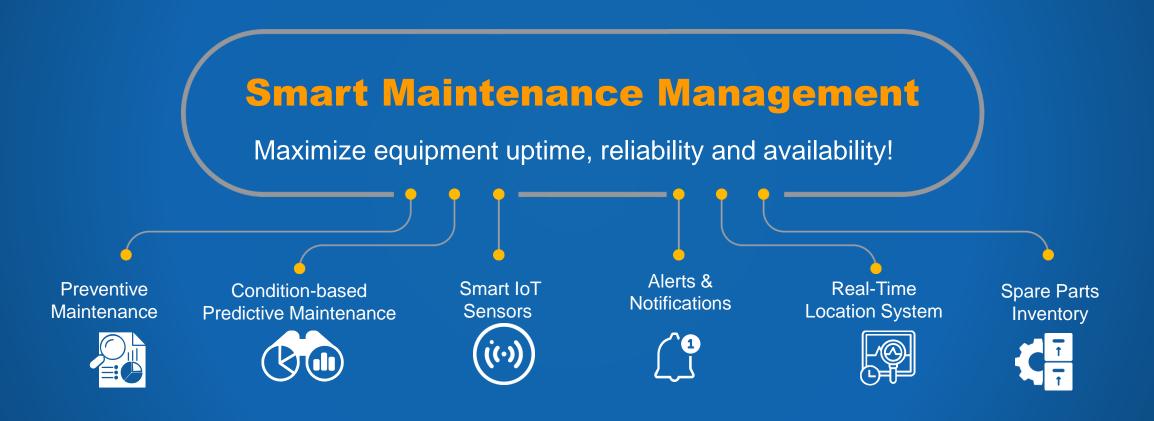

Operational Challenges

- Is unplanned downtime stopping your operations?
- Is your production machinery in tip-top shape?
- Can you predict when a machine should be shut down to prevent a failure?
- Do you know which assets needs to be serviced this month?
- Do you have the right spare parts to service them?
- Do you have real-time visibility of your shop/field maintenance workload?
- Is your field workforce linked to real-time information for faster and better decisions?
- Can you effortlessly allocate the work orders to meet the daily demand changes?
- Do you meet your operation's environment, emissions and safety standards?

Solutions for Achieving Greater Value, Reducing Costs, Eliminating Risks & Optimizing Operational Efficiency

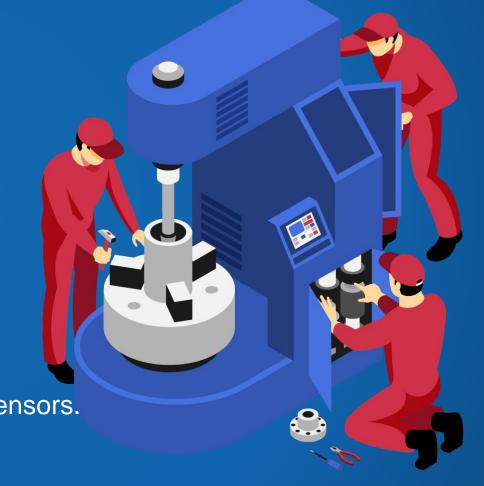

Preventive Maintenance

Maximize Equipment Uptime, Reliability and Availability!

Drive an efficient maintenance operation.

- Condition-based Planned & Corrective Maintenance
- Auto-triggering Work Order Creation
- Technician Dispatch with One-click Assignment
- Maintenance Task Lists
- Maintenance Dashboards
- Maintenance Cost Tracking
- Instant Maintenance Requests

You can also enable your existing maintenance application with the power of Dominate wireless IoT sensors.

Predictive Maintenance

Minimize Un-scheduled Downtime!

Our IoT-based Smart Maintenance Management is a CMMS on steroids.

Smart sensors collect real-time asset condition, usage, environment, and performance for predictive analysis.

Predictive maintenance algorithm helps determine the condition of in-service equipment in order to predict when maintenance should be performed. Alerts are sent to the right person at the right time so corrective action can be taken.

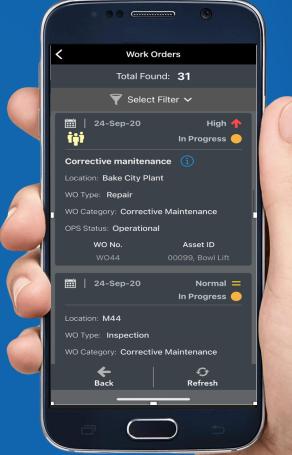

Mobile Field Management

Mobility Connects Your Field Techs to Equipment,

Anywhere, Anytime!

Achieve the full spectrum of maintenance management from the palm of your hand.

- Live Dashboards.
- Workflow automation.
- Automated time and cost tracking.
- Create, manage and update work orders.
- Maintenance checklist management

User-defined Preventive Maintenance Plans

Watches Your Equipment Maintenance Lifecycle Without You Watching It!

Setup unlimited recurring maintenance work orders to occur per piece of equipment based on conditions such as calendar date, odometer, usage hours and number of usages to automatically trigger maintenance notifications.

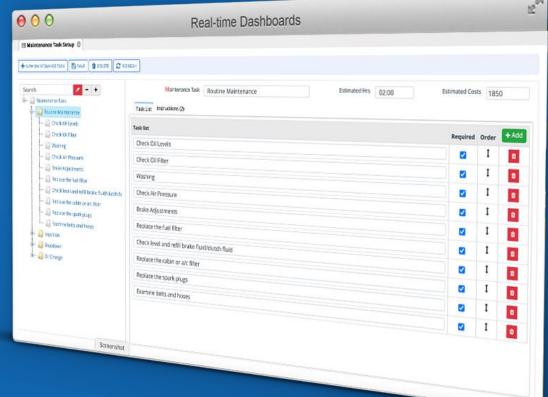

Maintenance Task List

Deliver Reliable & Consistent Maintenance Every Time!

Setup unlimited task lists for each type of maintenance to simplify and aid technicians when performing the service.

Assign estimated time to each task for comparison with the actual time spent to drive performance KPI.

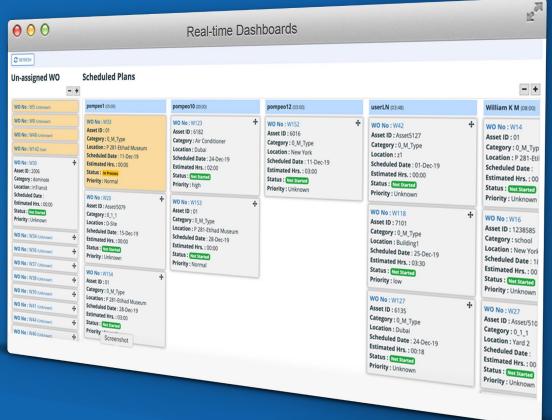

Technician Dispatch Dashboard

Empower Your Management With Real-time Data to Make Decisions Based on Current Conditions!

- View all the technician schedules in real-time.
- "one-click" to quickly and effortlessly assign work orders to a technician or a team of technicians.

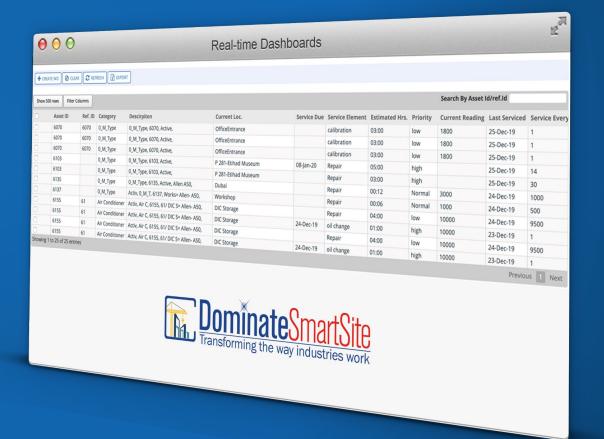

Work Order Creation & Planner

Your Maintenance Management On Auto Pilot!

- Auto-triggers work orders when equipment conditions (calendar date, odometer, usage hours, or the number of usages) are met.
- Work order request creation from the field or web portal.
- Work requests approval.

Maintenance Calendar Dashboard

Puts You On Top of Your Maintenance Operation!

Provides a bird's-eye view of all the maintenance activities and status whether not-started, in-process or complete. View the maintenance queue in both a calendar and detailed list view.

Maintenance Metrics Dashboard

Converting Your Maintenance Data into Actionable Intelligence!

- Your entire maintenance operation under your fingertip.
- Real-time visibility helps run a tight and efficient maintenance operation.
- View historical performance for previous periods.

Deploy Smart Site Platform's CMMS and witness the miraculous results:

- Improve operational efficiency.
- Improve asset availability and performance.
- Maximize equipment uptime.
- Minimize unplanned equipment downtime.
- Identify potential failures.
- Reduce total cost of ownership.
- Connect your shop/field operation to the top floor.
- Manage maintenance outsourcing better.

Smart Machine Monitoring

Increase Throughput, Capacity and Machine Utilization!

Retrofit Your Machines with Advanced IoT Sensors

Make your manufacturing floor a smart factory!

How is it connected?

- 1. Affix IoT sensor to your equipment in 5 minutes or less (all brands or types of equipment regardless of age).
- 2. Register the sensor using a mobile device.
- 3. Set alerts and notifications and have the system to watch your equipment, so you don't have to.

Smart Machine Monitoring

Increase throughput, capacity and machine utilization.

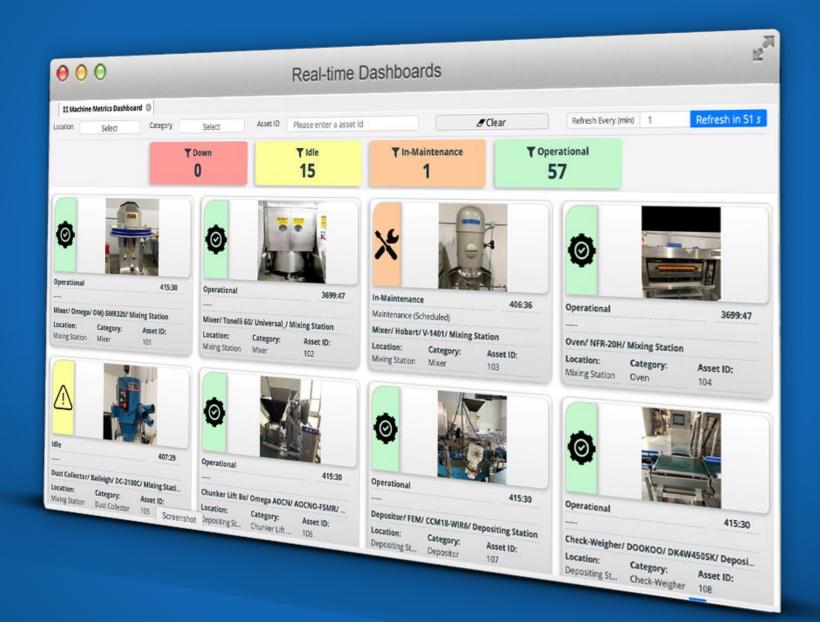

What it will do for you?

- Real-time visibility of your entire production equipment (reporting operational, idle, down, or inmaintenance status).
- Harness machine data and analysis.
- Real-time visual dashboards.
- Real-time alerts and notifications.
- Incident management and corrective actions.
- Automatically keeps track of working counter (hours, odometer, date, or the number of times it was used.)
- Notifies you if detected anomaly in the operation of the equipment using predictive analysis.
- Evaluate the life cycle of your machine for a better financial impact on your bottom-line.
- Seamlessly connects equipment with your maintenance team, production, and quality control.

Real-time Machine Metrics Dashboard

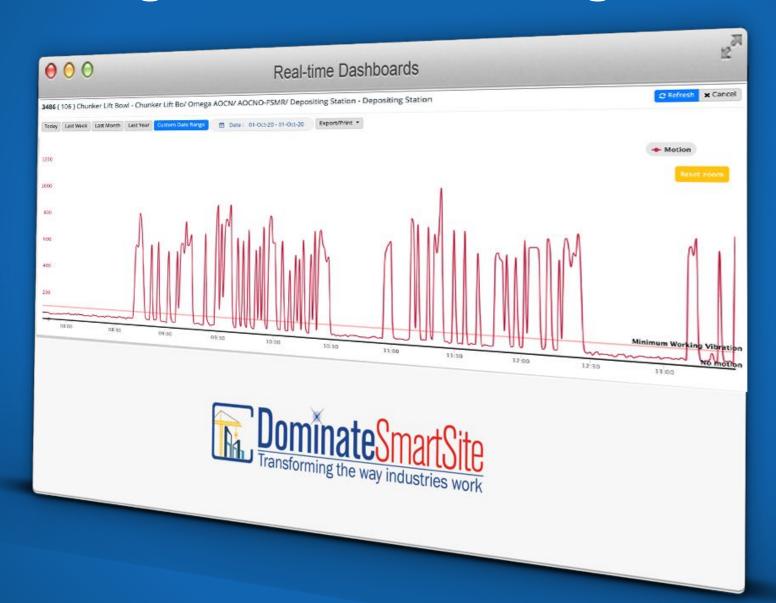

Real-time Equipment Condition Dashboard

Transforming Machine data Insight into Actions

Smart Asset Management (EAM)

Improve Asset Reliability, Availability, Visibility and Costs!

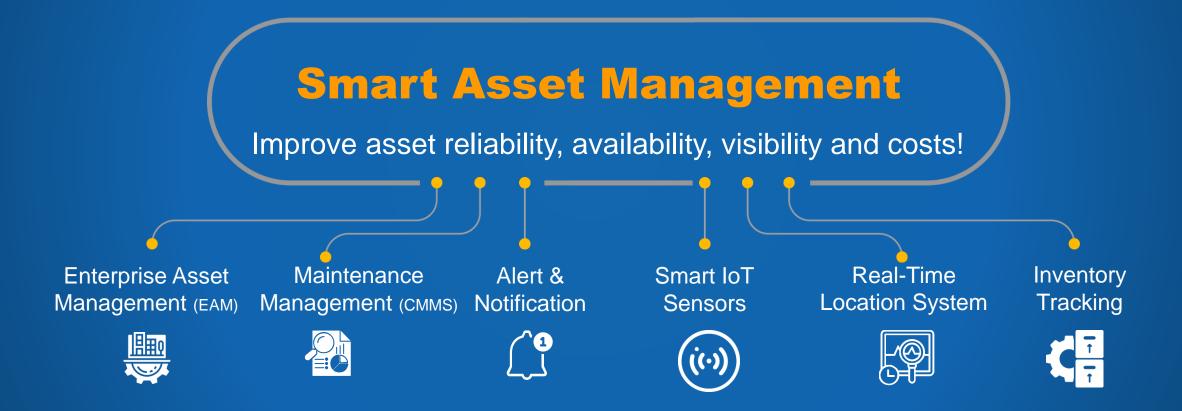

Asset Management Challenges

- Do you know what assets you have, how many, and where they are in real-time?
- Do you have visibility of your asset utilization? Do you know which assets are idle?
- Do you know the true Total Cost of Ownership of your assets?
- Do you have full traceability of the chain-of-custody of your assets?
- Are you able to allocate equipment to specific projects?
- Can you easily manage equipment planning and resource allocation?
- Are your asset audits slow and time-consuming? Do you find discrepancies in your audits?
- Are you in compliance with your asset management regulations?

Solutions for Achieving Greater Value, Reducing Costs, Eliminating Risks & Optimizing Operation's Efficiency

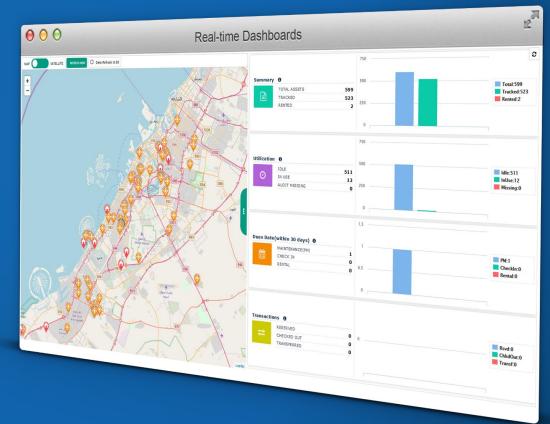

Cradle-to-Grave Asset Management

Manage & Track Your Assets. Indoor or Outdoor, Anywhere, Anytime.

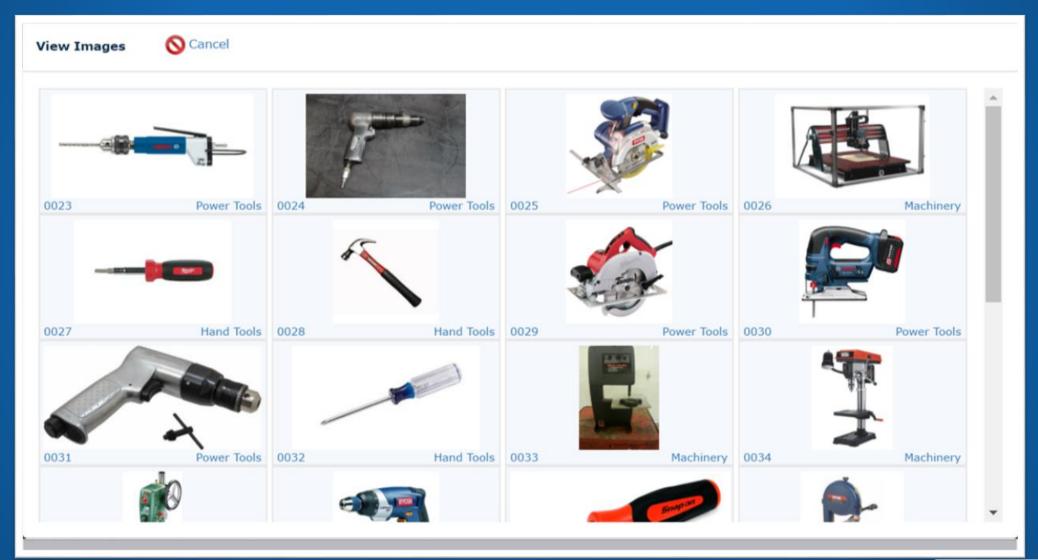

Comprehensive asset management platform with wireless IoT capabilities for managing your capital assets, equipment and tools.

You can also supercharge your existing application with the power of wireless IoT.

- Asset Type with unlimited Attributes
- Asset Check-out/In, Transfer-Out/In
- Asset Audits (Counts, Misplaced, Missing, Search)
- Asset Reservation and Scheduling Management
- Asset Rental Tracking

Tools & Kit Tracking

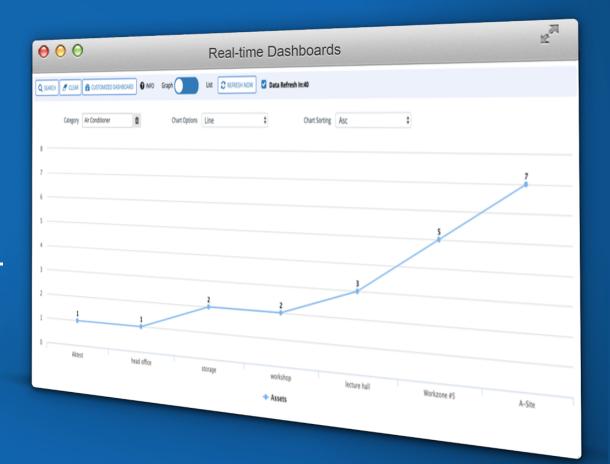

Asset Check-Out/In & Transfer-Out/In

Full chain of custody visibility.

- Quick asset check-out process.
- Check-out assets to a user, customer or project.
- Cost tracking of checked-out assets.
- Email due date reminders to custodians.
- Securely transfer-out/in assets to/from facilities.

Asset Audit

Quick and accurate asset audit.

- Eliminate loss of productivity chasing lost or misplaced assets.
- Comply with your asset management regulations.
- Know missing and misplaced assets in minutes.

Asset Reservation & Rental Management

Reduce CAPEX and expand your resources.

- Manage high valued assets efficiently and reduce rental costs.
- Unlimited reservations against an asset.
- Rental Management with due date reminders.

Real-time Visibility Like Never Before!

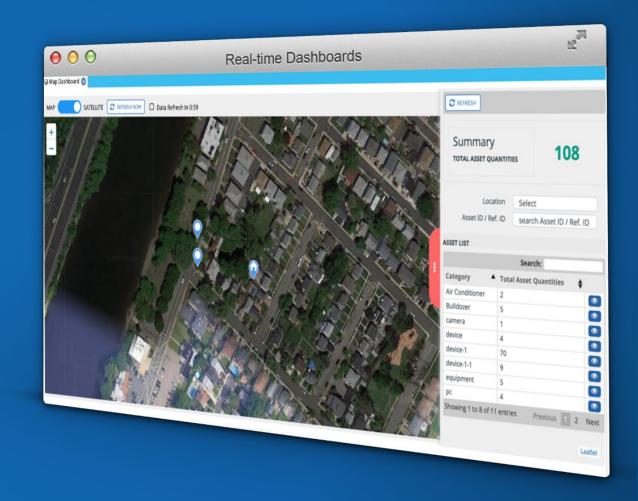

- What assets are currently available onsite?
- Where are they located at any time?
- Are they underutilized, or fully utilized?
- How much are they costing you?
- What assets & resources are available for allocation?
- Who is checking the asset in or out?
- How many assets are reserved for later use?
- How best to optimize asset utilization across projects?

Real-time Location System

Know What Asset You Have, How Many You Have, Where They Are In Real-Time

- Live Indoor & outdoor asset visibility
- View your assets and fleet on your site map or world map.

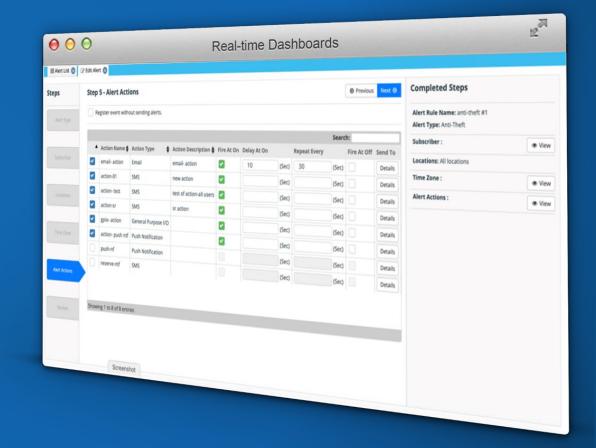

Real-time Alerts & Notifications

Watches Your Assets Without You Watching It!

Real-time alerts & notifications bring accountability, validation and security at every level.

- Rule-based Alerts
- Notifications
- Reminders
- Manage Restricted Asset Movements
- Actions (Pop-up message, SMS, Email)

Mobile Field Management

Mobility connects You to Assets, Anywhere, Anytime!

Smart phones and tablets help you achieve the full spectrum of asset management and maintenance capabilities in the palm of your hand.

- Android & iOS
- On-line or Off-line Working Modes
- Live Geo-location Tracking
- Live Dashboards

Analytics

Converting Your Asset's Raw Data Into Actionable Intelligence!

Data gathered from IoT sensors allows you to see the conditions of machines and determine when a machine can be brought online or shut down to prevent an issue.

Analyzes data gathered from a wide variety of sources to uncover patterns and trends that will deliver actionable insights to your operation.

- Live Dashboards
- Al-powered Insight
- Asset Utilization
- Asset Health
- Audit Analysis

Document Control

100% Paperless, 100% Digital.

Consolidate your documents, images, videos, transaction records, certifications, inspection approvals in a single digital portal, accessible from any location, on any device, by all authorized users across the enterprise.

- O&M manuals
- Drawings, Schematics
- 3D models, BIM
- Images, Videos
- Vendor Submittals

Inventory & Spare Parts Tracking

The Right Spare Parts at the Right Place and Time!

Control spare parts planning and availability to mitigate risks and boost operational performance.

- Inventory & Spare Parts
- Inventory Level Tracking
- Inventory Locations
- Inventory Audit
- Low Stock Alerts

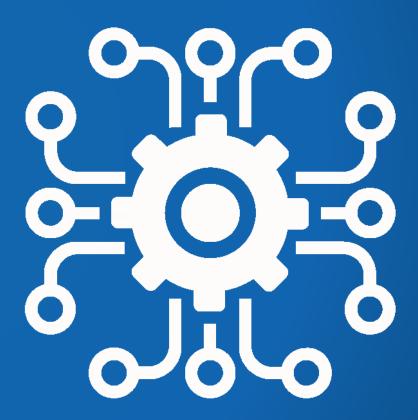

Integrations

Supercharge Your Operation With the power of IoT!

Extend your operation with real-time insights from streaming IoT data to improve efficiency and derive more value.

- Microsoft Power BI
- IBM Maximo
- Import/Export Wizards
- Extensive REST APIs
- IoT Sensors, GPS, LoRa and RFID
- Condition Monitoring IoT Hardware

End-to-End Security

We Take Security Seriously!

Through unique device identification, system provides secure environment of trusted devices and communications.

Authentication is enforced prior to communication for proof-of-origin of data. Transport-level security helps prevent corruption. Role-based and user-based access control manages cloud and mobile access.

- Role and user-based access control
- HTTPS point-to-point connection
- Message integrity, confidentiality and replay protection
- Node authenticity
- AES 128 counter mode
- OMAC1 message integrity
- Transport-level security

Data

Insight

Action

Real-time dashboards
providing information about
Asset Audit, Asset Count,
Transactions, Due Dates, etc.
to make confident decisions
based on actual data.

insights into Asset

Maintenance, real-time
demand & supply gaps to
drive confident, proactive &
data-driven decisions.

Advanced analytics providing recommendations for better management of assets

Example

Asset Audit

7 staplers were allocated to the Zone B. Today, system is showing one is missing.

Example

Maintenance & Supply Gaps

At the rate, the power generator "Asset01" is working; it needs to be serviced in 15 days.

Spare part inventory at site A is low on spark plugs. This will affect PM service of "Asset02" & "Asset03" which are due next week.

Example

Recommendations for Asset Management

We need to purchase several new drills. To make a good purchasing decision, it is necessary to view all details of previous drills' lifecycle – from acquisition to disposal. Did they last as long as expected?

Example

Asset Count Presently, there are 5 air compressors available on Site A.

Idle Assets Currently, there is one idle generator on Site C.

Asset Services There is a PM due date for Asset008 next week. Its current Odometer shows 12330.

Check-in/out John from Trade B's group has checked out 2 saw drills yesterday.

Service Due Dates The excavator working in Zone 3 should be inspected for proper functioning tomorrow.

Notifications The rented asset with tag ID 120031 must be returned in two days.

Asset Audit There are 3 assets missing from Site A.

Real-time Insights

2

Example

Asset Management What kinds of alerts have been issued for critical assets recently? Restricted movement? Anti-theft?

Schedule Issues Excavation work in location A was planned to be done in 150 hours. The group has been working for almost 200 hours now, & it is not finished yet. This is mainly due to excavators breaking down repeatedly. If things keep going like this, it is reasonable to expect one week of delay.

Cost Issues It was planned to spend no more than \$11,000 for renting heavy machinery, but at the end it costed \$19,000. Why did they have to keep the machine for a longer duration of time?

Asset Productivity Ratios We spent \$4500 on assets to complete task A. Our revenue was \$2920. This means for each dollar we spent, we earned \$0.65 with Asset Productivity Ratio of 65%.

Example

Asset Optimization Aging assets are hindering the project's progress. Perhaps we need to replace some of them with new ones.

Financial Decisions There are 5 underutilized generators on site A. Should we transfer or sell them?

Financial Advices The asset with tag ID 120086 has been serviced 5 times during the past 2 months at a total cost of \$3400. Perhaps we need to replace this asset with either a new one or a rental.

Tactical Advices Company's profit margins are being gobbled up by underutilized assets. This is primarily because purchased assets are used for a short while and then left aside and forgotten. Perhaps we need to rent assets instead.

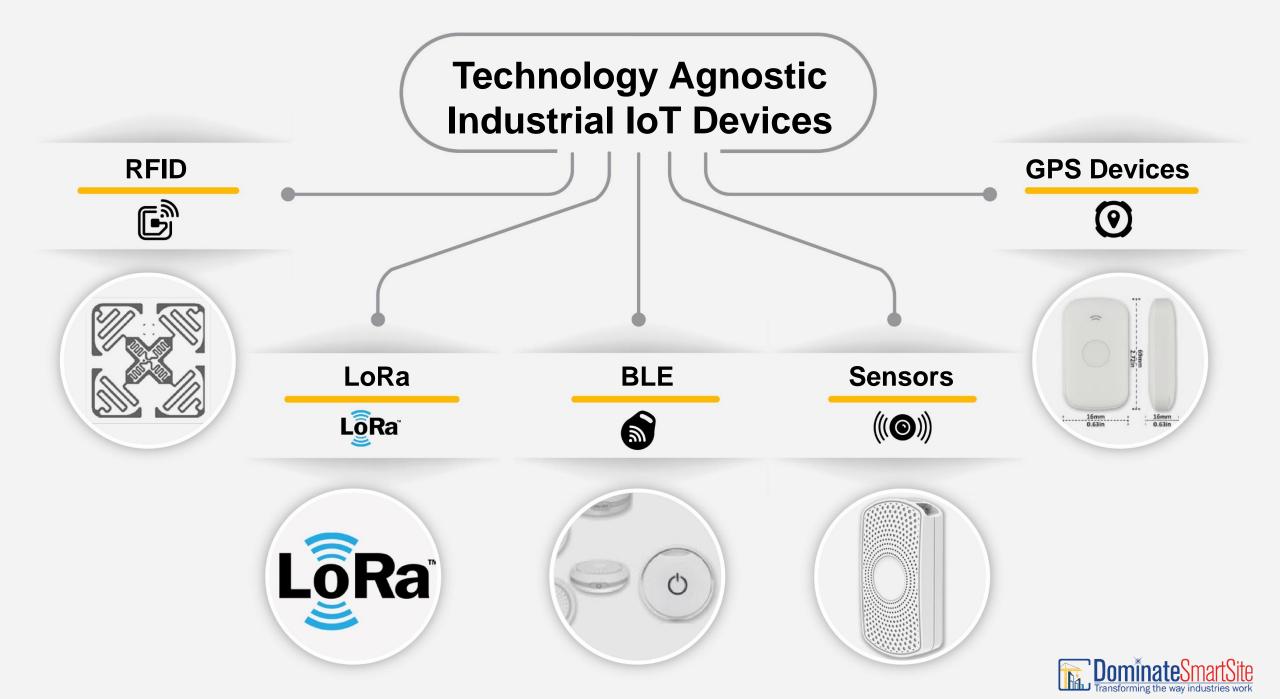

Use Data to Realize Efficiencies, Minimize Costs, Control Risks & Improve Asset Performance.

- Gain complete visibility and control of all equipment and assets across your facility.
- Leverage data automation for asset allocation analysis and reporting.
- Eliminate the need to search for lost or misplaced items.
- Improve asset availability and cut down on time wasted for asset tracking and management.
- Automate asset management, including check-in/checkout, auditing, and reporting.
- Reduce asset-related operating costs, extend asset life, and improve ROA (return on assets).
- Optimize asset utilization within and across projects.

Plug & Play Industrial IoT Hardware

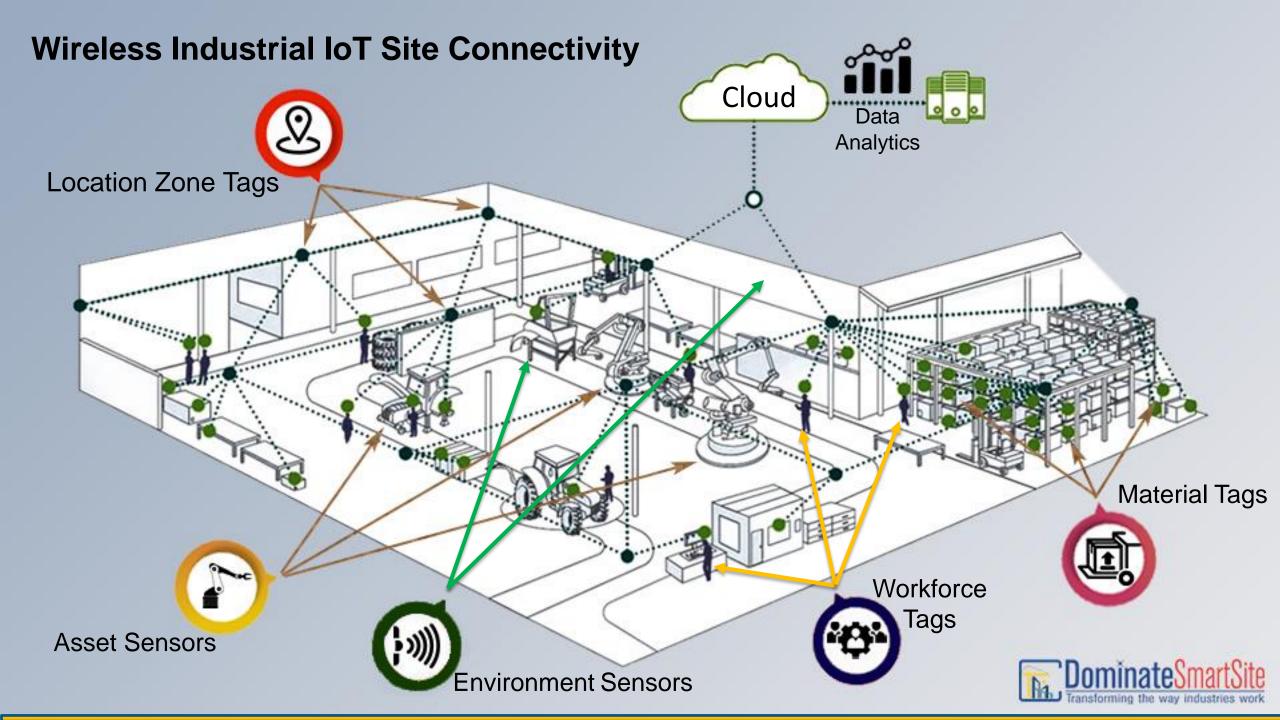

IoT That's Ready to Use. Ready to Scale.

Pre-configured IoT hardware designed for harsh industrial environment without a need for AC power or network connection enables your operation to be IoT ready within days.

- No AC Power Required. Runs on long-lasting Battery (12 months).
- No Internet Connection Required (creates its own BLE mesh network).
- Quick Installation and Expansion (less than 2 minutes per device).
- Read Range of Up to 100 Meters (300 ft)
- IP67 Ratings (water & dust proof)
- High Availability with No Single Point of Failure

Plug & Play Industrial IoT Devices

Key Value Drivers of Dominate Smart Site Digital Transformation Adoption

Asset

- Enhanced visibility & control.
- Asset Lifecycle extension.
- Optimize asset utilization.
- Improve return on asset (ROA)

Maintenance

- Real-time visibility of maintenance operation.
- Links maintenance team to realtime data.
- Reduce wrench time and get more maintenance done with fewer resources.

Production

- Faster production bottleneck detection.
- Operating costs reduction.
- Reduction in unexpected production downtimes.
- Enhance labor productivity growth.

Environment

- Energy usage reduction.
- Safety and compliance.
- Harness environment data with detailed analysis.

Key System Features

- End-to-end turnkey IoT Solutions SaaS or on-premise installations.
- Quick learning curve with minimal operation disruptions.
- Plug & play, pre-configured and ready to go IoT hardware.
- Technology agnostic with quick DIY hardware installation.
- Mobile-enabled (iOS & Android).
- End-to-end security.

Zero Investment & Risks

- Low-cost bundled hardware & software monthly subscriptions.
- Accelerate time to value with no upfront costs or CAPEX.
- No long-term contract.

Worry-free Support

- Online knowledge base access.
- Dedicated consultants.
- Phone & Email support.
- Data migration.

Our Goal

Partner with our clients to transform their organizations in the ways that matter most to them.

This means embedding digital analytics and design into core processes and mind-sets; building capabilities that help organizations and people to thrive in an ever-changing context; and developing excellence in execution to ensure that actions translate into outcomes, quickly and sustainably.
