

Water Leak Sensor

This Sensor Tag is a battery-based high precision digital water leak detector. It detects the water leak and wirelessly (via BLE) sends the data to the IoT Gateway. This device can also connect to the BLE Mesh Network through connecting to our Low Latency Router.

Application:

- Environment Monitoring
- Water Pipe Leaks

Description	BLE Water Leak Sensor
Model No.	DS-Water Leak
BLE Type	BLE 4.1. Can also connect to our BLE Mesh Network.
Size	Diameter: 60 mm (2.36 in) Height: 15 mm (0.6 in)
Power Output	100m (+4dbm)
Ingress Protection	IP65. Dust & Water Proof
Alarm Indicator	LED Status Indicator
Battery Type	CR2450 Coin Battery
Battery Lifetime	24 months*
Battery Replaceable	Yes
Color	White
Material	ABS
Operating Temperature	-20 to +50°C -4 to +122°F
*Note	Depends on the usage
